Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,3-10,12-16 and 27-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The original disclosure does not support the instant claim language of "inseparably connected".

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-2,3-10,12-16 and 27-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Franchere et al.

See the appropriate paragraph of the 11/23/05 Office action.

With respect to the newly added limitations, they appear to contain new matter and have not been further considered.

Response to Arguments

Applicant's arguments filed 3/24/06 have been fully considered but they are not persuasive.

Art Unit: 1743

Applicants' acknowledge the original specification does not use the language "inseparably connected". In the absence of "literal" support for this phrase in the original disclosure, the Office believes "inseparably connected" is new matter. This is especially true because Applicants' are attempting to define over the cited prior art based on the language "inseparably connected". Even if the language were to be considered, the original disclosure does not contain a sufficient description that would permit one having ordinary skill in the art to know how to make the "inseparably" connection.

Applicants' remarks are correct that "claim 2" is not pending. The Office regrets the typographical error.

Applicants' state Franchere et al. fails to teach "inseparably connected" wells. The Office maintains the language "inseparably connected" is new matter. Even if there was support for these amendments, the Office would take the position that permanent connection (e.g. integral construction) would have been obvious (see <u>In re Larson et al.</u> {144 USPQ 347}).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lyle A. Alexander whose telephone number is 571-272-1254. The examiner can normally be reached on Monday, Wednesday and Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/007,031
